SPECIALTY ITEMS FOR

CEMENT PLANTS

RGA is your provider for Gum Rubber Discharge Sleeves, Conveyor Belt and Lacing, and Bulk Tanker Hoses

RGA USES QUALITY GLOBAL AND FLEXCO PRODUCTS: CONVEYOR BELT, BELT FASTENERS, AND MAINTENANCE SOLUTIONS THAT HELP MAXIMIZE CONVEYOR UPTIME, PRODUCTIVITY, AND SAFETY.

GUM RUBBER DISCHARGE SLEEVES

Constructed from pure natural gum rubber, these sleeves are abrasion, cut resistant and very durable.

They reduce product spillage to a minimum.

While normally constructed from 1/4" thick material, they are also available with 1/8", 3/8", and 1/2" wall gauges. Our sleeves are custom made for each application. To order, give the outside size of the round or square spout, and the length you need. We will custom build the sleeve to fit, and ship it to you in short order.

We also have available various fastening methods, which our professional sales staff can recommend for your particular application.

CONVEYOR BELT AND LACING

In addition to various grades and types of conveyor belting, we also handle a variety of lacing, and the complete Flexco™ line of lacing and belt wipers. Our experienced belt crew can install belting and lacing right on your conveyor. We also offer the more durable "Hot Vulcanized" splices for critical areas. Call us for a quote of your exact application.

BULK TANKER HOSES

Our Cement Discharge hoses feature a heavy-duty 1/4" abrasion resistant tube, and are some of the most durable on the market. Please give these a try for your next hose replacement.

STANDARD SIZES:

- 4" ID x 20' Cement Discharge hose with an aluminum female camlock coupling each end.
- 3" ID x 10' Rubber Hot Air Blower hose with an aluminum female camlock coupling each end.
- We also have custom length assemblies, bulk hose, couplings, and clamps available. Hot air hose is also available in metal hose assemblies.
- We take most major credit cards, and offer 30 day terms for qualified customers.

HOT AIR BLOWER

Designed to transfer hot, nonoily air (up to 400°F) from manifold blowers or in-plant compressors to holding tanks used in the transfer of dry bulk materials.
